1.Open BT on smartphone/tablet.

2.When the BT device "P2" is detected, click "P2" to connect.

3.The wireless function only support to input accompany music.

4.When the sound console has been connected with wireless, other device will can't find the sound console in their BT list. Please disconnect the previous device when you want to connect it to new device via wireless.

# V.Overview of Multi-device Connectivity

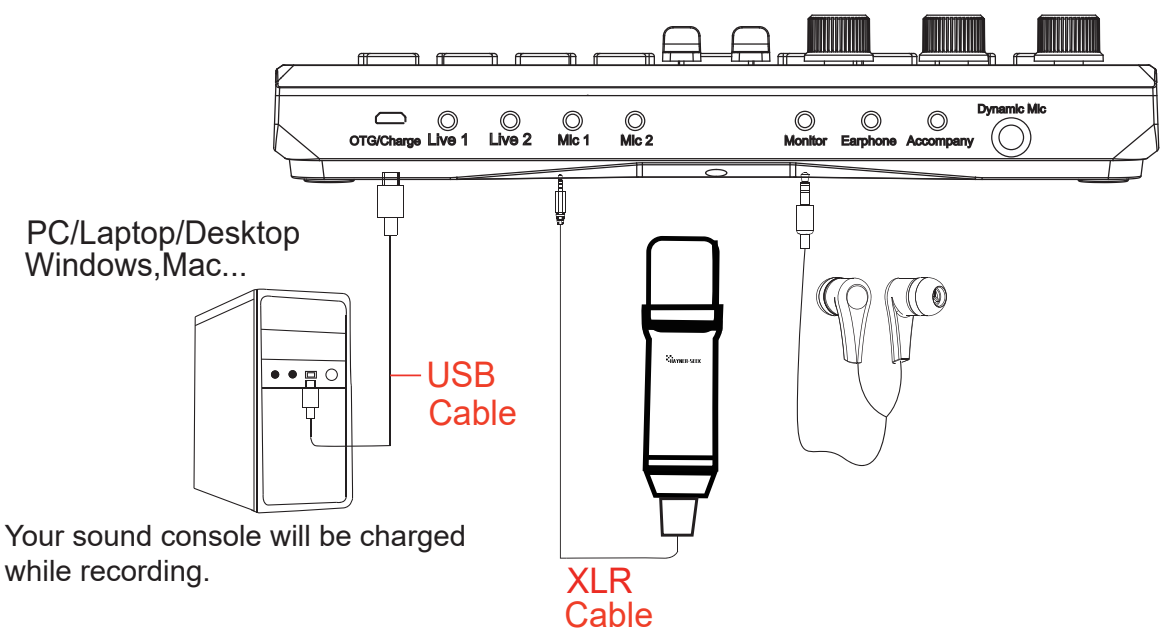
Tip:

1. The following usage methods apply to live broadcast and recording.
2. If your phone/tablet do not have a 3.5mm audio port, you need an adapter.

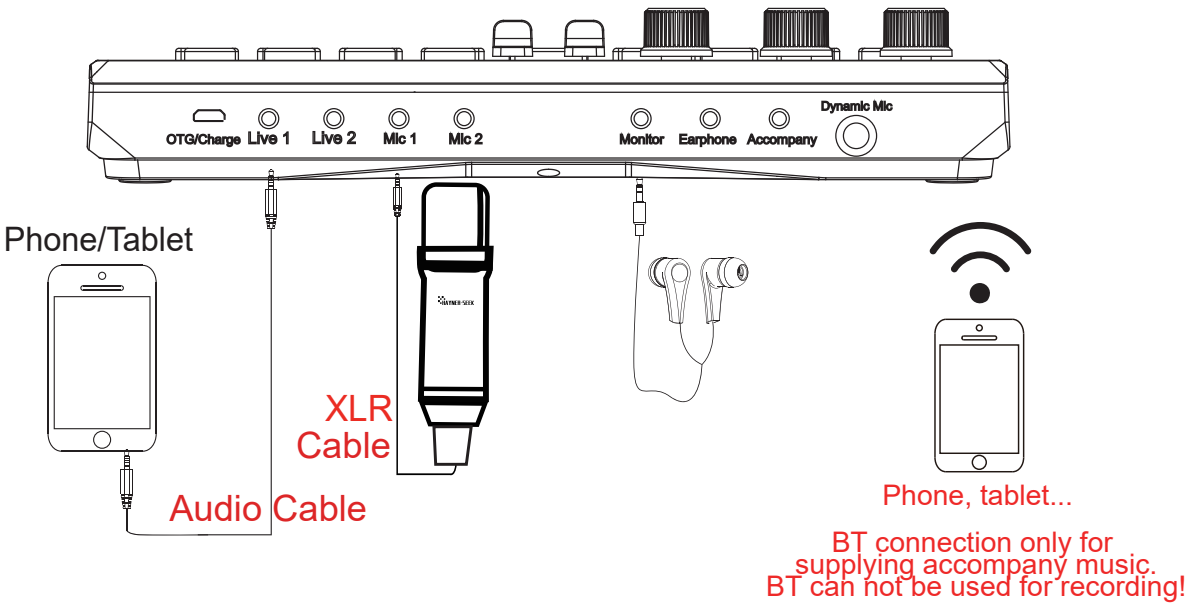
## 1. PC record/live, the same PC supply accompany music

1 To live broad cast on a computer/laptop, you need to connect the charging port of the sound console through the USB charging cable.

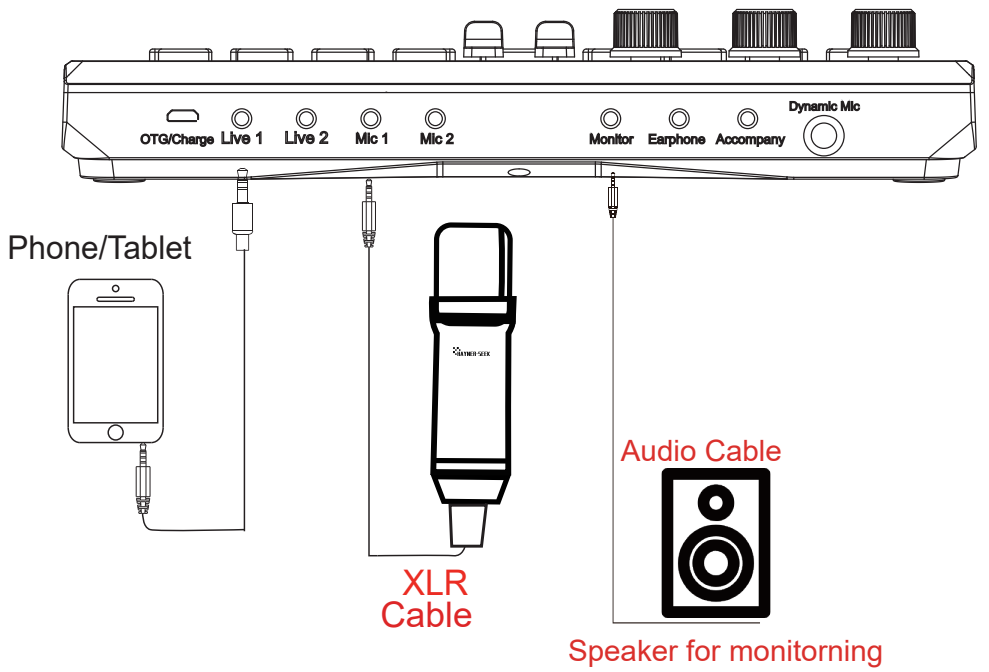
2 The computer will automatically identify and install the sound card driver.



## 2. Phone record/live, the other phone supply accompany music



## 3. Phone record/live, speaker monitoring



Tip: If your phone/tablet do not have a 3.5mm audio port, you need an adapter.Please get the adapter from smartphone brand offical shop.

To check if the sound card has been identified and installed by the computer.

1.Right-click the loudspeaker on the taskbar of the computer, open “Playback device” . If “MVSILICON B1” is displayed and set as the default, it means the sound card has been recognized by the computer and installed successfully.

2.Right-click the loudspeaker on the taskbar of the computer, open “Recording equipment” . If “MVSILICON B1” is displayed and set as the default, it means the sound card microphone has been recognized by the computer and installed successfully.

**Tip**:

a.The console may not work properly or at all if connected to a USB hub. This depends on the functionality of your hub. If this is the case, plug the device directly into the computer.

b.If the computer does not show the sound console as a default device, you must set the console as default. If you need to exclude other recording or playback devices from a live broadcast on your computer, you must disable all other audio devices, leaving only your sound console.

You can scan the QR code for more help. E.g. download user manual, view guidence video. We also set up a message area, contact after-sales. Please feel free to contact us if you have any questions.
